

Rendos

Christopher is a 2-year-old baby who suffers from Cerebral Palsy, Epilepsy and a host of other medical disorders due to a complicated birth. Christopher has five older brothers and sisters who also all have special needs and mental health disorders. The parents struggle to support the family with their limited income. They work hard to balance work and their children's many appointments. This family is very close and always supports each other. The oldest daughter, who is 15-years-old, is now also pregnant and due in April. The parents would love to be able to provide a special Christmas for their children.
